

## Pest Repeller Ultimate AT

Pest Repeller Ultimate AT® I ordered this product because I was having problems with mice and roaches in my home. The mice and roaches have been crawling through a whole underneath my sink. Unfortunately, I have a landlord who is very slow in making repairs so I wasn't expecting this whole to be filled anytime soon. As a result, I had the landlord call an exterminator and he put down a series of bait dishes and some glue traps. He found a dead mouse behind my stove while he was putting down bait. Well, that was a precursor for things to come. Over the next few days, I found a bunch of dead mice in my apartment and I had to throw them out. I even almost stepped on a dead mouse in my room on my rug. Who wants to go through the hassle of throwing out dead mice? Yeah, me neither. So, I went online and did a search and this company came up. This is what they had to say about the new Pest Repeller Ultimate AT: The Ultimate® AT is our newest and strongest pest repeller with tremendous ion-pumping power and louder ultrasonic sound waves that no pest can escape. Totally redesigned with a built-in plug on the side for outlet versatility, this revolutionary pest control unit turns your home or office into a fortress against pests. Unlike other repelling methods that expose your family and pets to harmful toxins, the Pest Repeller Ultimate® AT utilizes electronic technologies that are safe and environmentally friendly. The Ultimate® AT is perfect for your home or business, and is the most popular product among consumers worldwide. I figured that if this didn't work, I would try something else. The Pest Repeller AT came in about 3 weeks. All I had to do was plug it into my outlet in the kitchen. Well, it's been about 4 months and I haven't seen any mice (or roaches) for that matter. So far, I am happy with this product and relieved that I no longer have to throw out dead mice. Although, I haven't had this product long, I would recommend it based on the results that I have gotten. To learn more [Click Here](#)
